

EFT Tapping - Opportunities for Abundance

Releasing your negative conditioning and belief systems about abundance are the first part of you achieving more wealth, freedom and success in your life.

The next is taking inspired action on the opportunities that come your way as a result of your new alignment with the vibration of abundance.

There are opportunities for abundance coming your way all the time, but if you're not open to seeing them, they will pass you by without you even seeing them, or you won't feel like you're in a position to take advantage of them.

Today's tapping sequence is all about being open to seeing opportunities as they arise, and carefully assessing which ones are right for you.

Set Up Phrase

Karate Chop Point:

I'm open to seeing all the opportunities that are coming my way to create financial wealth and abundance, and I deeply and completely love and accept all of me.

I see opportunities everywhere to create more financial wealth and abundance and I'm ready to take action on them now, and I deeply and completely love and accept all of me.

I'm open to seeing opportunities to create more abundance and financial freedom in my life and I love and appreciate who I am right now.

Take a deep breathe. Now you need to pay attention and look for all the opportunities that are coming to you to create abundance.

Not all of them will work out or will be appropriate for you, so make sure you apply a stringent assessment process so you can take action on the ones that are right for you. Is it in alignment with your values and goals? Does it fit with your mission and purpose? Does it leverage your particular skills and talents? Do you feel any resistance? Is that resistance just fear about stepping out of your comfort zone, or is there a part of yourself that's saying 'No, this is not right'?

Whilst it's important to look before you leap and do your due diligence on opportunities that come your way, don't allow yourself to become stuck with analysis paralysis. Wealthy and successful people make informed decisions quickly and change their mind slowly.
